

"Insights into the functioning of the forest ecosystem under pressure - lessons learned from 40 years of the Sanasilva Inventory and 30 years of the LWF Programme "

on Tuesday 17 June 2025, 9:00-17:00 Englersaal at the Swiss Federal Research Institute WSL, Zürcherstrasse 111 8903 Birmensdorf

With Sanasilva and the Long-term Forest Ecosystem Research (LWF), Switzerland has been participating for 40 years in one of the longest and most comprehensive cooperation programmes for forest condition assessment and forest ecosystem research in Europe. The workshop on the occasion of this anniversary offers the opportunity to get to know the measurement methods in detail during a tour of our WSL research facilities in the morning. Findings about the condition and processes in our forests are presented and discussed through posters and oral presentations. We invite participants to take part in a preliminary survey, discussion stands and a final plenary discussion on the requirements and needs of a future LWF. The Workshop presentation will be held in German, French or English, with keywords displayed in one of the other languages.

Event programme

08:00 - 09:00	Door opening & registration	
Part 1 Origin and current form of ICP Forests (Sanasilva, LWF)		
09:00 - 09:30	Welcome and opening (M. Schaub and P. Waldner)	
09:30 - 11:15	Organized tours on the WSL campus on concepts and partners of the LWF programme (LFI/NFI, Sanasilva, TreeNet, LWF Test, Training and Demonstration Facility, LWF Lab, Pedothek, MODOEK)	
11:15 – 12:00	Poster Pitch (short poster announcements, Session Chair: M. Schaub)	
12:00 - 13:00	Lunch break and poster session	
Teil 2 Results and reflection		
13:00 - 15:15	Welcome WSL Directorate (C. Hegg), FOEN (M. Reinhard), Chair ICP Forests (M. Ferretti), LWF Programme (A. Gessler) 40 years of ICP Forests (M. Ferretti et al.) Waldzustand anhand 40 jährlichen Sanasilva-Inventuren (S. Hunziker et al.) <i>Forest Condition based on 40 years of Sanasilva-Inventory</i> Luftbelastung und Nährstoffkreisläufe (P. Waldner, A. Thimonier, K. Meusburger, M. Schaub, P. Vollenweider et al.) <i>Air pollution and nutrient cycles</i> Waldwachstum unter ändernden Umweltbedingungen (S. Etzold, R. Zweifel, K. Meusburger, et al.) <i>Forest growth under changing environmental conditions</i> Kohlenstoffkreisläufe im Wald (F. Hagedorn et al.) <i>Carbon cycling in forests</i> Diversität der Bodenvegetation und Einflussfaktoren (T. Wohlgemuth, A. Thimonier, et al.) <i>Diversity of ground vegetation and influence factors</i> Verknüpfung LFI, Sanasilva und LWF (E. Thürig et al.) <i>Linking NFI, Sanasilva and LWF</i> Zukunftsvisionen Waldökosystem-Forschung (A. Gessler, C. Fischer, M. Ferretti, et al.) <i>Visions for long-term forest research</i>	
15:15 - 16:00	Poster session and individual discussions (flip-charts).	
16:00 - 16:30	Plenary discussion on the expectations towards the future LWF Programme	
16:30	Apéro

Peter Waldner et al.	Do changes in carbon and nitrogen pools in soils of five Level II plots reflect the measured input and output fluxes?

Registration

Registration via Ticketino (<https://www.ticketino.com/de/event/-/201916>) is closed, but it is still possible on site or by email (addressed to peter.waldner@wsl.ch) for participation in the morning sessions, afternoon sessions, or the whole day.

Posters

Posters will be displayed in the Engler-Saal. Each poster can be introduced with 1-2 slides during the poster pitch (1-2 min). Please send 1-2 slides in advance to peter.waldner@wsl.ch.

Stakeholder survey on the LWF and Sanasilva inventory

We would like to take advantage of this anniversary to reflect on the LWF Programme. We therefore kindly invite all stakeholders to take part in an on-line survey which will be circulated via email before the event. Your feedback and suggestions are important for us and will be discussed during the plenary session and considered for shaping the future of LWF.
